Company Comment | May 7, 2015

Growth at core business robust

While Coway's 1Q15 earnings missed consensus—due to a sales contraction at its ODM business (China)—we are now able to confirm that sales momentum at the firm's domestic business remains intact (sales up 7% y-y). Despite the lack of overseas sales growth, we believe that the company is well positioned to maintain a high dividend payout ratio. As such, we stick to our Buy rating.

1Q15 results: Overseas business sluggish, while domestic business upbeat

- On an IFRS non-consolidated basis, Coway announced 1Q15 sales of W506.1bn (up 2.3% y-y) and operating profit of W98.9bn (up 10.2% y-y), with both of the numbers missing consensus and our estimates.
- In detail, we attribute the disappointing sales growth to sluggish sales at its overseas business. Due to intensifying competition in the air purifier segment (in China), the play's ODM air purifier sales shrank 27.5% y-y. We point out that the overseas business generates roughly 7% of Coway's sales and around 5% of its operating profit (its margins are lower than that at Coway's other businesses).
- However, sales at the health appliance division—the firm's core business—rose 6.1% y-y thanks to: 1) favorable rental sales growth (up 7.5% y-y) and lump-sum sales improvement (up 7.4% y-y). In addition, both the rental cancellation ratio and loss rate on rental asset disposals (both are key profit determinants for the company) continue to be well managed. Given these positives and despite the soft numbers at the overseas business, Coway continues to successfully defended its operating profit.

Maintain Buy and raise target price to W110,000

- We maintain Buy and raise our target price from W100,000 to W110,000 in line with moving the valuation period used in our discount cash flow (DCF) model. However, we lower our 2015, 2016, and 2017 earnings estimates due to sluggish exports.
- We expect the firm's dividend payout ratio (currently around 50%) to be raised to 60% in 2015 and to 70% in 2016.
- Given its: 1) dividend merit (2.8%); 2) stable business (centers on renting out products); and 3) unique earnings structure (relatively free from the economic cycle), we positively view Coway.
